DEFINING “COLLEGE”

Any form of high-quality education or training beyond high school.

This includes certificate programs, workforce training, apprenticeship programs, two- and four-year degree programs, and military service.

THE GOAL

The goal is to ensure that at least 60 percent of Americans have some sort of degree, certificate, or other postsecondary credential by 2025. This is to keep up with changing workforce demands that require education or training beyond high school to fill positions.¹

■ National goal
■ Americans currently with a postsecondary credential
■ West Virginians currently with a postsecondary credential

COLLEGE READINESS

Three out of every ten first time college freshmen in West Virginia are **not college ready**.² Students who are not college ready may be required to take supplemental courses that help them fill in the knowledge gap to successfully complete college-level coursework.

THE VALUE OF A DEGREE

Deciding to go to college is an investment in your future -- and in West Virginia's future. Students who earn a college degree earn hundreds of thousands of dollars more over a lifetime than students who do not pursue postsecondary education, plus students who go to college experience more stable employment and are more likely to be civically engaged and contribute to their communities. And with West Virginia's changing economy, it is predicted that by 2020, more than half of all jobs in the state will require a postsecondary credential.¹
